SECTION 00

The Strategic Framework

Content for a travel-advisor practice has one job: build trust at scale. Conversion happens 1:1. Trust happens 1:many.

What Content Is For (And Isn't)

CONTENT IS	CONTENT ISN'T
Building trust before someone needs to book	A direct-response sales channel
The proof layer ("here's a real receipt")	Brand-awareness for everyone (it's for under-40 affluent specifically)
The voice rehearsal that calibrates the brand	A vanity exercise around follower counts
The asset that compounds over 24 months	The thing that pays this month's bills
The mechanism that turns a 5-min call into trust earned in advance	Substitute for the warm-network and partnership funnels

The North Star Metric (Content)

CONTENT KPI

"Inbound DMs / inquiries per month that mention specific content." Not impressions. Not followers. Not engagement rate. The single test: when a new lead shows up, can they reference a piece of your content? At M12, target = 30% of new leads have content attribution. At M24, target = 50%.

The 50/30/20 Mix (Recap)

%	TYPE	PURPOSE
50%	Practical / Tactical	Authority + SEO + saves. Rankings, comparisons, decision frameworks.
30%	Opinionated / Voice	Differentiation. Hot takes. The brand persona showing up.
20%	Personal / Story	Trust + humanization. Client trips, behind-the-scenes, your own travel.

The Distribution Pyramid

1. **Newsletter (owned)** — biweekly. The asset. Highest-trust audience. Newsletter is the only channel that survives algorithm changes.
2. **Instagram (rented, visual primary)** — daily. Where the broadest demo lives.
3. **LinkedIn (rented, B2B primary)** — 3x/week. Business travel funnel + partnership credibility.
4. **TikTok (rented, reach upside)** — 2x/week. Cold-reach + viral potential. Plan for 90 days before judging.
5. **YouTube Shorts (rented, evergreen)** — TikTok repurposed. Adds search-traffic upside.

SECTION 01

Channel Selection — Where Content Actually Lives

Not every segment deserves the same content investment. Match the segment to where its audience actually consumes content.

The Segment × Channel Matrix

SEGMENT	NEWSLETTER	INSTAGRAM	LINKEDIN	TIKTOK
All-Inclusives (specialty)	High	High	Low	High
Honeymoon	Medium	High	Low	Medium
Bach Weekend	Low	High	None	High
Family Travel	High	Medium	Low	Low
Business Travel	Medium	Low	High	None
Milestone Group	Low (newsletter via Family)	Low	Low	None

What This Means for Production

- **Newsletter focuses on:** All-Inclusives takes + Family vacation planning + Business travel insights + Honeymoon long-reads. (Milestone Group doesn't need content; it gets referrals.)
- **Instagram focuses on:** All-Inclusive ranks + receipts + honeymoon visuals + bach destinations.
- **LinkedIn focuses on:** Business travel + partnership credibility + founder lessons.
- **TikTok focuses on:** All-Inclusives hot takes + bach vibes + honeymoon comparisons.

Production Capacity Allocation

You're not producing content for all 6 segments at equal weight. The split:

SEGMENT	% OF WEEKLY CONTENT OUTPUT
All-Inclusives (specialty, cross-cuts)	40%
Honeymoon	20%
Business Travel	15%
Family Travel	15%
Bach Weekend	5%
Brand / Founder / Off-Topic (Toronto, FAM trips, hot takes)	5%

All-Inclusives over-indexes because: (a) it's the specialty edge, (b) the content cross-cuts honeymoon + family + bach segments, (c) SEO upside is highest there.

— CONTENT FOR SEGMENT 01

All-Inclusives Content

The specialty. The credibility engine. The brand differentiator. 40% of content output goes here because it cross-cuts every leisure segment AND establishes the unfair advantage no algorithm can replicate.

Channel Priority

Instagram – TIER 1 Visual proof. Carousel rankings travel well. Real-resort photography is the entire brand.	TikTok – TIER 1 Comparison videos, hot takes, mistake-list content perform best here.	Newsletter – TIER 1 Long-form rankings, deep comparisons, "the verdict" pieces all live here.	LinkedIn – TIER 3 Occasional, not primary. Frame as advisor-industry takes.
---	--	--	--

The Five Content Pillars (All-Inclusives Specific)

PILLAR	WHAT IT IS	CADENCE
The Ranking	Specific properties ranked by category. "5 best adults-only AIs in Mexico." "The Hyatt Inclusive Collection, ranked."	1x/wk
The Comparison	Head-to-head: Excellence Playa Mujeres vs Punta Cana. Le Blanc vs. Atelier. Sandals vs. Excellence.	1x/wk
The Receipt	Real client booking math: room category, amenity package, total added value.	2x/wk
The Mistake	"5 mistakes people make booking Riviera Maya." "Why you shouldn't book base room at Excellence."	1x/wk
The Hot Take	"Sandals is mid." "Maldives in August is a scam." "Tulum is performance art."	1x/wk

Instagram Content Templates — All-Inclusives

CAROUSEL TEMPLATE 1 — THE RANKING

Slide 1 (hook): "I've stayed at 20+ all-inclusives. Here are the 5 I'd actually recommend." [Photo: a hotel beach]

Slides 2-6: One property per slide. Photo + name + 2-line take. Color-coded verdict tag (Recommend / Conditional / Skip).

Slide 7: "What I left out: the 15 that aren't on this list."

Slide 8 (CTA): "Newsletter has the full list with my honest takes. preface.travel."

Save rate: this format hits 8-15% save rate consistently. Saves matter more than likes.

CAROUSEL TEMPLATE 2 — THE HEAD-TO-HEAD

Slide 1: "Excellence Playa Mujeres vs. Excellence Punta Cana. I've been to both."

Slide 2: "The 4-line summary." (Best for: PM. Best for: PC. The verdict: PM. Why most people pick PC anyway:.)

Slides 3-6: Side-by-side on 4 dimensions: food / rooms / beach / vibe.

Slide 7: "I'd pick Playa Mujeres. Even if it costs \$400 more."

Slide 8: CTA — "Book a 20-min call: preface.travel."

SINGLE POST TEMPLATE — THE RECEIPT

Image: Hotel folio screenshot or photo of upgraded room (anonymized).

Caption: "Last week's booking. \$5,500 Excellence Playa Mujeres, 7 nights."

What they booked: Junior Suite Pool View.

What they arrived to: Excellence Club Two-Story Rooftop Suite.

Plus: \$200 resort credit, breakfast at all restaurants, butler service.

Cost over Booking.com: \$0.

This is the entire pitch."

Hashtags: keep to 5-8. Mix specific ([#excellenceplayamujeres](https://www.instagram.com/excellenceplayamujeres)) and category ([#caribbeantravel](https://www.instagram.com/caribbeantravel)).

TikTok Templates — All-Inclusives

TIKTOK TEMPLATE 1 — THE HOT TAKE OPEN

Opening 3 sec (hook): "Sandals is mid. I'll tell you why."

3-15 sec: "I've stayed at 20+ all-inclusives, including 4 Sandals properties. They're fine. They're not better than Excellence, Le Blanc, or Royalton Luxury at the same price point — and the marketing is doing a lot of work."

15-30 sec: Specific comparison. Sandals Royal Caribbean Jamaica \$4,200/pp vs Excellence Playa Mujeres \$4,300/pp.

30-45 sec: Specific differences (room category, food, beach).

Final 5 sec: "Newsletter has the full hierarchy."

Caption: 1 line, no hashtags above 3.

TIKTOK TEMPLATE 2 — THE MISTAKE

Opening hook: "Three things you're doing wrong when booking an all-inclusive."

Mistake 1 (3-15 sec): "Booking on Booking.com. You don't save anything. You just lose the upgrades."

Mistake 2 (15-30 sec): "Booking the base room. Bait pricing. The actual product is the Club tier."

Mistake 3 (30-45 sec): "Booking Riviera Maya June through September. Sargassum will end you."

Close: "Bonus: you should be at Excellence Playa Mujeres, not Sandals. But that's a different video."

Newsletter Content — All-Inclusives

The newsletter is where all-inclusive content goes deep. Format:

- **Lead piece (500-700 words):** A single ranking, comparison, or insider piece. "Excellence Playa Mujeres vs Punta Cana — the verdict." "The 4 Hyatt Inclusive Collection properties worth booking."
- **Receipt block:** One real booking with full upgrade math.
- **Three quick takes:** One AI hot take + one industry observation + one calendar tip.

Honeymoon Content

Aspirational + visual. Less hot-take, more "here's the trip you want."

Honeymoon content is the strongest IG segment because the demographic spends hours saving honeymoon posts.

Channel Priority

Instagram – TIER 1 Pinterest-style saving behavior is real. Carousels of honeymoon properties hit 10x baseline reach.	TikTok – TIER 2 "Honeymoon ideas you haven't thought of" format performs well.	Newsletter – TIER 2 Honeymoon deep-reads (Maldives ranked, Bali vs Bora Bora, Italy itineraries).	LinkedIn – TIER 3 Mostly skip. Use only for "lessons from planning 50 honeymoons" founder posts.

The Four Honeymoon Content Pillars

PILLAR	WHAT IT IS	CADENCE
The Profile	"The 4 honeymoon profiles (which one are you)" — quiz/framework format. Beach & lie down / Multi-city Europe / Adventure + recover / Maldives over-water.	Monthly
The Destination Deep Dive	One destination, one carousel/long-read. "Maldives ranked." "Why Greek Islands beat Amalfi for honeymoons." "Bali by region."	2x/mo
The Property Spotlight	One hotel, photo essay + commentary. Why it works for honeymooners specifically.	2x/mo
The Common Mistake	"3 honeymoon planning mistakes." "Why your shortlist is wrong."	Monthly

Instagram Templates — Honeymoon

CAROUSEL — THE PROFILE QUIZ

Slide 1: "Honeymoon planning is paralyzing. Here's the framework I use."

Slide 2: "Question 1: Sit-on-the-beach-for-a-week, or move every 3 days?"

Slide 3: "Question 2: Activity-packed, or actively-doing-nothing?"

Slide 4: "Question 3: Comfort food / familiar / restaurant menus, or local + adventurous?"

Slide 5: "Question 4: \$10K budget, \$15K, \$20K, \$25K+?"

Slides 6-9: 4 profile cards. Each: title, 1-sentence summary, 2 destination recommendations.

Slide 10: CTA — "Book a 20-min call. preface.travel."

This format gets shared in honeymoon-planning DMs. High save rate.

SINGLE POST — THE PROPERTY SPOTLIGHT

Image: One stunning hotel photo (real, not stock).

Caption: "Six Senses Bhutan is the most underrated honeymoon property right now.

\$1,200/night sounds high. It includes everything: meals, activities, transfers between five Six Senses lodges spread across the country.

For couples who want 'somewhere your friends haven't been' — this is the answer.

On a 9-night itinerary I just booked: \$11,000/pp all-in including flights. Honestly, that's not crazy for what you get."

Hook is the destination, not the brand. Property name is the credibility.

TikTok Templates — Honeymoon

TIKTOK — "POV: YOU'RE PLANNING A HONEYMOON"

Opening: "POV: you're planning a honeymoon and you've narrowed it down to 5 places. They all look the same on Instagram."

15-30 sec: "I'll save you 3 hours. Pick based on these 3 questions."

30-45 sec: "Beach-and-don't-move OR move-every-3-days? / Tropical OR seasonal? / \$15K range OR \$25K+ range?"

45-60 sec: "Beach-tropical-\$15K = Riviera Maya 5-star or Maldives shoulder season. Beach-seasonal-\$15K = Greek Islands. Multi-stop-tropical-\$25K = Bali + Singapore."

Close: "Book a call and I'll narrow it from 5 to 1."

Bach Weekend Content

The demographic that scrolls IG and TikTok hardest. Smaller content investment, but highest conversion rate from content to inquiry. 8-15 women planning together = high-share content goes viral within the group.

Channel Priority

Instagram – TIER 1 The maid-of-honor is on IG. Carousel destinations + villa tours convert.	TikTok – TIER 1 "Bach destination ideas" videos blow up. Demographic is exactly here.	Newsletter – TIER 3 Light coverage. One bach-specific newsletter per quarter.	LinkedIn – SKIP Not where the buyer hangs out.

Business Travel Content

LinkedIn-led. Different audience, different tone. The buyer is a founder or sales exec, not a couple planning a honeymoon. Voice is the same — opinionated, specific — but the substance shifts from "where to vacation" to "how to optimize the travel you're already doing."

Channel Priority

LinkedIn — TIER 1 The buyer lives here. Founders + sales leaders + consulting partners read LinkedIn daily.	Newsletter — TIER 2 Once a month: BT-focused issue. Hotel ranks for execs, loyalty math, travel optimization.	Instagram — SKIP Wrong demographic for this funnel.	TikTok — SKIP Same as IG. Founders aren't here for travel advice.
--	--	--	--

Four BT Content Pillars

PILLAR	WHAT IT IS	CADENCE
The Loyalty Math	Hyatt Globalist vs Marriott Titanium vs Hilton Diamond — when each pays off. Status match strategies.	2x/mo
The Hotel Pick	"3 Toronto hotels for execs." "Best Marriott in Manhattan for late check-in." "Where to stay in Austin for SXSW."	2x/mo
The Optimization Insight	How Privé / STARS / Impresario actually layers onto a business trip. The 15 minutes a week you're losing on Marriott.com.	2x/mo
The Founder Lesson	Story-led posts. "Last week I rebooked a flight for a client at 11pm on a Sunday from Lisbon." Drives credibility + trust.	2x/mo

LinkedIn Post Templates — BT

INSIGHT POST — THE LOYALTY MATH

Hook line: "If you travel for work 40+ nights/year, you're picking the wrong hotel chain."

Body: "Most founders default to whichever chain they started with (Marriott if their first job had Bonvoy, Hilton if SPG was discontinued).

But the loyalty math diverges sharply at the 40-night mark:

— Hyatt Globalist (60 nights or 100K base points): suite upgrades on every paid stay, free breakfast, late check-out. The cleanest deal of the three.

— Marriott Titanium (75 nights): suite upgrades on cash stays only, 50% bonus points, free breakfast at most brands. Largest network but stingiest perks.

— Hilton Diamond (60 nights or 100K points): breakfast, room upgrades (rare), executive lounge. Lowest threshold but lightest amenities.

At 40+ nights/year, Hyatt is the math. At 75+ nights, you go Marriott for the footprint."

Closer: "I help founders + sales execs in Toronto pick which chain and stop wasting status. DM if you're under-optimized."

STORY POST — THE DISRUPTION SAVE

Hook: "Got a text at 11pm Sunday. Client's flight from Lisbon back to YYZ cancelled. He had a 9am Monday board meeting."

Body: "Standard travel-disruption playbook:

1. Check next-available alternatives (3 options in 5 minutes via Fora flights desk).
2. Re-book on TAP via FRA, arrives YYZ 7am Monday.
3. Alert hotel of late check-in.
4. Text client: 'Done. Here's your new itinerary. Sleep.'

He made the board meeting. He texted thanks. He didn't have to spend 2 hours on hold with the airline at 3am from a Lisbon hotel."

Closer: "This is the actual value-prop of a travel desk. The Marriott points stay yours. The 11pm scramble doesn't."

— CONTENT FOR SEGMENT 05

Family Travel Content

Newsletter-led. Parents read newsletters more than they scroll TikTok. Less visual emphasis, more practical-utility content. The audience overlaps heavily with All-Inclusives, so much of the content cross-pollinates.

Channel Priority

Newsletter – TIER 1 Parents read in the morning, after kids are in school. Family content gets 50%+ open rates here.	Instagram – TIER 2 Carousels (kid-friendly resort guides). Less Reels-heavy than honeymoon.	LinkedIn – TIER 3 Occasional family-travel posts. Often when planning around a school break.	TikTok – SKIP Demographic doesn't consume primary travel content here.

Newsletter Growth Tactics (In Order)

- 1. Default everywhere (M1 onwards):** Every IG, TikTok, LinkedIn post ends with "newsletter at preface.travel."
- 2. Welcome sequence (M2):** 3-email welcome on signup. (Email 1 = welcome. Email 2 = the all-inclusives starter guide. Email 3 = "want a 20-min call?")
- 3. Cross-promotion swaps (M4):** Trade newsletter mentions with 5-10 other Toronto creators (food, lifestyle, real estate, wedding) at 500–1,000 subs.
- 4. Lead magnet (M5):** "The All-Inclusives Decision Guide" gated PDF. Email-gated download. Promote on IG.

The Repurposing System

One source → 5 outputs. Don't make content separately for each channel. The repurposing waterfall is the only way to ship at the cadence required.

The Weekly Cycle

DAY	ACTION	OWNER	OUTPUT
Sunday	Founder picks topic from stock bank	You	Topic + angle
Monday	Founder records 5-8 min voice memo	You	1 raw voice memo
Tuesday	VA transcribes + drafts newsletter	VA	Newsletter draft
Wednesday	VA extracts derivatives: 1 LinkedIn post + 1 IG carousel + 1 IG reel script + 1 TikTok script + 1 LinkedIn carousel (PDF)	VA	5 derivative drafts
Thursday	VA designs IG carousel in Canva + edits all videos	VA	Visual assets ready
Thursday PM	Founder reviews batch (30 min)	You	Approved content
Friday 10am	Newsletter publishes	VA	Live
Friday-Sunday	VA schedules week's social via Buffer	VA	Queued
Saturday	Founder records 2 TikToks (batch, 15-30 min)	You	2 raw clips
Sunday	VA edits TikToks → schedule for Mon/Wed	VA	Queued

The Five Outputs From One Topic

OUTPUT	FROM SOURCE	TIME
Newsletter issue (~600 words)	Voice memo transcript, edited + structured	~45 min VA
LinkedIn post (300–400 words)	Strongest insight from voice memo, reframed for biz/professional audience	~20 min VA
IG carousel (10 slides)	The newsletter's structure, broken into one-slide-per-point	~60 min VA (incl. Canva design)
IG reel + TikTok (60–90 sec)	The hottest take from the voice memo, scripted for video	~30 min script + 15 min you record
LinkedIn carousel PDF	The IG carousel, re-styled for LinkedIn (longer slides, more text)	~30 min VA

The Quarterly Best-Of Repurpose

Every 3 months, the highest-performing newsletter pieces get re-bundled:

- Top 3 issues → gated PDF lead magnet
- Top 5 hot takes → LinkedIn carousel + IG carousel
- Top resort reviews → updates to the All-Inclusives website page
- Top client stories → new Receipts section on homepage

Analytics & Optimization

Track the leading and lagging indicators separately. The leading indicators tell you if it's working; the lagging tell you if it mattered.

Weekly Analytics Review (Friday 5pm, 15 min)

METRIC	WHERE	WHAT'S NORMAL
Newsletter open rate	Beehiiv	40–55%
Newsletter click rate	Beehiiv	3–7%
Newsletter new subs (this week)	Beehiiv	10–100, scaling
IG reach this week	IG Insights	10K–100K, scaling
IG saves rate (top posts)	IG Insights	3–8%
LinkedIn impressions	LinkedIn	3K–30K/wk
TikTok views (top post)	TikTok Analytics	1K–100K, volatile
DMs received this week	Manual count	2–15 scaling

Monthly Deep Dive (Last Friday, 60 min)

- Inquiries with content attribution:** Of new leads this month, how many referenced a specific post / newsletter / channel? Target: 30%+ by M12.
- Top 3 posts (by saves or shares):** What's the pattern? Topic, format, hook? Repeat the pattern.
- Bottom 3 posts:** What didn't work? Topic mismatch? Hook too soft? Visual problem?
- Channel performance ratio:** Hours invested / inquiries generated. Cut the bottom channel if it's been bottom for 2 consecutive months.
- Newsletter cohort behavior:** Open rate by signup vintage. If newer subs open less, the recent acquisition source is wrong.

The Kill / Scale Decision (Quarterly)

SIGNAL	DECISION
Channel produces <2 inquiries / quarter after 90 days	Kill or reduce to 1 post/week
Channel produces >15 inquiries / quarter	Double cadence; consider paid acquisition
Pillar performs 3x baseline	Increase that pillar to 40% of output
Pillar underperforms 50% of baseline 2 quarters in a row	Drop the pillar; reallocate
